

## **TCP Group Condemns malicious rumors and vows to take legal action to safeguard its reputation**

**January 1, 2021** - The TCP Group has always unswervingly supported the 'One-China' principle and fully supported the strategic agenda of the Chinese government. TCP does not support anyone who subverts the sovereignty and territorial integrity of China and we do not intend in any way to encourage any such people or groups. We have recently been made aware of materials posted or circulated by so called Key Opinion Leaders on Weibo, WeChat and other social media channels whose malicious intent is to bring TCP's reputation into disrepute. We will take all the necessary legal actions against these individuals and those financing these activities to put an end to such malicious accusations. As one of our most important markets, we are fully committed to China and to our Chinese customers, partners and stakeholders.
